Dear Mr. Merklin, P.E.,

This email follows our conversation earlier today regarding the D&B information request for the Northrop Grumman and Naval Weapons Industrial Reserve Plant (NWIRP) Sites. The NYSDEC has satisfactorily responded to all of the documents D&B, on behalf of the Town of Hempstead (aka Levittown Water District), has currently requested.

Currently, D&B is preparing, a basis of design report for the treatment of Freon 113 impacting the Levittown Water District 7A-8A and 13 wellfields. This report should be ready in the near future for DOH review. D&B has agreed to supply the NYSDEC with a copy of this report for review also.

Should you require any additional information at any time, please contact me at your earliest convenience.

Thanks,

Steven M. Scharf, P.E.
